Please Note: Lamps and items purchased for resale do not qualify for credit.

Service

Since Master Tanning, Inc. has been distributing tanning equipment nationwide for over 21 years, our Technical Service staff and knowledge is second to none. Now, there are three ways to get the information you need about your tanning equipment.

- The extensive online support allows you to see step-by-step troubleshooting, part numbers, manuals, wiring schematics and more. Visit www.tanning-bed-parts.com
- You can also contact the Technical Support Team at 1.800.552.4446.
- In the unlikely event that you may need to have your tanning equipment serviced, the Master Tanning, Inc. Service Network provides you with the most professional, quality service technicians in the country.

Important Note

Important Power Requirements For Tanning Equipment:

Today's 220-volt equipment is extremely sensitive! Since electrical voltages vary from place to place, the output and life of tanning lamps can be affected. For equipment to operate properly and to make it last longer, we may suggest installation of a buck booster transformer to adjust the electrical voltage. Please see the electrical requirements for your equipment on the earlier pages located at the top of the feature list. If you have any questions, please don't hesitate to call your sales representative.

DANGER: Equipment advertised herein emit ultraviolet radiation. Follow usage instructions listed on the device. Avoid overexposure. As with natural sunlight, overexposure can cause eye and skin injury and allergic reactions. Repeated exposure may cause premature aging of the skin and skin cancer. **WEAR PROTECTIVE EYEWEAR; FAILURE TO DO SO MAY RESULT IN SEVERE BURNS OR LONG TERM INJURY TO EYES.** Medications or cosmetics may increase your sensitivity to ultraviolet radiation. Consult physician before using any tanning equipment if you are using any medications or have a history of skin problems or you are or believe yourself to be especially sensitive to sunlight. If you do not tan in the sun, you are unlikely to tan from the use of tanning equipment. Before use, review the recommended exposure position, exposure schedule and certified lamp type(s) described on the labeling of each device. Read the warning label and instructions on any tanning equipment advertised herein that you purchase.
