Unpacking and Inspection

The canopy box contains the canopy and a pair of gas springs. The bench box contains the bench, assembly hardware, stand legs and skirt. Inspect the items and make sure they are free from any visible damage. Report the extent of any damage to the transportation company.
Assembly Procedures

1. Lay the bench upside down on the floor. Locate the two stand legs.

2. Remove the six 5/16” x 1” bolts and 5/16” washers installed in the bench. Attach the stand legs, with the two small skirt mounting holes toward the front, by installing the center bolt first. You may have to gently push the sides of the legs in to align holes. Tighten with the Allen wrench.

3. Turn bench over. Install hinge brackets to ends of bench such that the short boss engages the stud above the bolt hole, and the long boss engages the hole below the bolt hole. Secure using 5/16” x 1” Allen-head bolts and 5/16” metal washers. Tighten bolt snug, then an additional half turn.

4. Place the bushings into hinge brackets.

5. Lift the canopy and hold it between the hinge brackets.

6. Insert 5/16” x 1 1/2” bolts with nylon washers into both hinge brackets. Tighten bolts into the endcap threaded inserts until snug, then an additional half turn. Do not overtighten to avoid damaging threaded inserts.

7. The gas springs have a locking mechanism. Follow the directions below for the type you received.

Type 1
Pry back the locking clip with a flat screwdriver.

Type 2
Remove locking clip to install or remove gas spring.

8. With a helper holding the canopy open, align ends of gas spring ball joints with pivot studs and push into place. Be sure rod end is down as shown. DO NOT lower canopy until both gas springs are engaged!

9. Lift and lower canopy a few times to lubricate gas springs for optimum performance.

10. Connect the canopy to bench power cord to the bench receptacle. Align the terminals and firmly push on until seated then tighten the threaded locking ring.

11. Plug the three-prong 220V AC power cord into a dedicated outlet (see Electrical Requirements).
The unit is shipped with a Remote Control Bypass Plug installed. Your sunbed will not operate without either the bypass plug or a remote system connected. If remote operation is desired, see Remote Connections.

12 On the front of each leg are two holes for skirt mounting brackets. Locate the two brackets and attach them as shown with two #10-32 x 1/2” screws and two #10-32 locking nuts each.

13 Attach the skirt as shown by inserting the tabs along the top of the skirt into the slots in the bottom of the bench cover and tucking the bottom edge under the skirt mounting brackets. Adjust the skirt mounting brackets to secure the skirt.

Remote Connections

Your sunbed incorporates advanced circuitry allowing it to connect and communicate with most remote control systems. If a remote system is to be used, first determine whether the remote system is a T-Max® System or a standard remote system operating with a control relay. Follow the appropriate instructions for your system type.

CAUTION

The remote connection is not designed to supply or accept high voltage, nor can it provide power to an external timer. The sunbed's remote interface circuitry operates on 5 volts, attempting to connect it to any higher voltages will damage the sunbed as well as void your warranty.

T-Max® Products

The T-Max® remote systems offer the ultimate in sunbed control, while allowing the tanner easy straightforward operation. Your sunbed is configured to directly connect to this system, including the new wireless remote system. The circuitry inside your sunbed eliminates the need for the T-Max® 1A or 3A when connecting to the T-Max® Manager series. Your sunbed supports the auto addressing feature of the latest T-Max® Manager models and the following parameters: 5, 6, 7, 8, 9, 10, 15 and 23. See your T-Max® manual for descriptions of these parameters and how they function.

T-Max® Wireless Remote System

The T-Max® AP-900 eliminates wires in your salon, allowing easy setup without hiring an electrician to run wires. It also protects your investment from damage by isolating each unit from one another. Your sunbed arrives “wireless ready”, which means it connects directly to the T-Max® wireless system. Older tanning beds, and T-Max® managers, also utilize this system but require a T-Max “Power Injector” (PI) to provide the needed power to the wireless unit.

Remote System Hook-up Scenarios

Follow the diagrams below and on the next page to see the many different scenarios for hooking up your salon. If you need further assistance, call T-Max® directly at (417) 338-5101.

Scenario 1 - T-Max® Manager Series with Complete Wireless

Connect one AP-900 (with Power Injector) to the Manager and one AP-900 to each of the tanning beds. Install as many beds as you like with this configuration. Units that do not communicate with T-Max will need an AP-900 with Power Injector and an additional 3A to operate. If you have an older T-Max® Manager that doesn't support auto addressing, set the address of each sunbed manually as described in Setting the address manually. You can place your sunbed at any location in the series.
Scenario 2 - T-Max 3A with Wireless
In single sunbed installations, the T-Max® 1A and 3A can offer the same control as the T-Max® Manager, eliminating the need for a Manager. If you’re using a 1A in this manner, it must have a chip labelled “master” installed on its circuit board. The remote control bypass plug must not be used in this configuration. The 3A may be used as a “master” with no modification.

After you have set the T-Max® 1A’s, or 3A’s, address to “0” (refer to your T-Max® user’s guide) and the sunbed’s address to “1”, simply connect one AP-900 (with Power Injector) to the T-Max® 3A and one AP-900 to the tanning bed.

Scenario 3 - T-Max® Manager Series with Wireless combination
Wireless can be easily added to an existing salon already utilizing T-Max®. Connect one AP-900 (with Power Injector) to the Manager and one AP-900 to each wireless ready tanning bed. The rest of the salon may be “daisy-chained” together and connected to the Manager.

Scenario 4 - T-Max® Manager Series with Wireless combination 2
Connect one AP-900 (with Power Injector) to the Manager and one AP-900 to a wireless ready tanning bed. The rest of the salon may be “daisy-chained” together and connected to the wireless equipped tanning bed, eliminating the need to wire the Manager to the tanning beds.

Scenario 5 - T-Max® Manager Series with wires
As always, this tanning bed is fully compatible with a wired T-Max® system. Simply connect the RJ-22 modular cables, described in the T-Max® Manager manual, into the remote port(s) located on the canopy and follow the instructions that came with your remote system.

Scenario 6 - Single Bed wired to T-Max® 3A
In single sunbed installations, the T-Max® 1A and 3A can offer the same control as the T-Max® Manager, eliminating the need for a Manager. If you’re using a 1A in this manner, it must have a chip labelled “master” installed on its circuit board. The remote control bypass plug must not be used in this configuration. The 3A may be used as a “master” with no modification.

After you have set the T-Max® 1A’s, or 3A’s, address to “0” (refer to your T-Max® user’s guide) and the sunbed’s address to “1”, simply connect the RJ-22 modular cables, described in the T-Max® user’s guide, directly into either of the smaller ports located on the canopy and either port on the back of the T-Max® 1A or 3A.

NOTE: A T-Max® 1A with a “master” chip can be substituted for a 3A.

Scenario 7 - Non T-Max® Remote System wired to unit
Most non-T-Max® remote systems control the sunbed by the use of a relay. The relay operates the sunbed by connecting and disconnecting a pair of wires leading from the sunbed. Refer to the user’s manual provided with your remote system to determine if it operates in this way. To connect your sunbed to this type of system a remote interface kit is required. Contact your place of purchase to obtain the kit. The illustration at right details a typical connection. Follow the instructions provided with the kit and from the remote’s manual to make the necessary connections.

Go straight to the source with all your T-Max® brand remote questions: (417) 338-5101
Setting the address manually

Before connecting your sunbed to the T-Max® Manager or T-Max® 1A or 3A, the address of your sunbed must first be set. Set the address manually as described below.

Setting the Address
1. Make sure the sunbed display is showing “0”.
2. Press the red stop button and, without releasing it, press the green timer button and hold both for three seconds. The display should indicate an address number from “1” to “255”.
3. If you are using a T-Max® 1A or 3A as a “master” remote, the address of the sunbed must be set to “1”. If you are using a T-Max® Manager each sunbed must be assigned a different address. To adjust the address, press the green timer button to count up until the desired number (from 1 to 128) is achieved. Addresses 252 to 255 are not normally used.
4. Press the red stop button to return to the normal display mode.

Using Your Sunbed

Before using your sunbed, please note the following:

- Your skin should be free of cosmetics, tanning oils, or other body lotions prior to tanning except for those specifically made for use with tanning devices. However, do not remove natural body oils by bathing or showering immediately before tanning.
- Keep treated hair from contacting sunbed surfaces. Many hair products can damage the sunbed acrylic. Wear a shower cap or towel if you use gels, mousses, sprays, or other hair products.
- Your sunbed is designed for individual use. Always wear the safety goggles supplied with your sunbed or another approved pair of goggles, as defined under 21 CFR 1040.20. Regular sunglasses do not provide adequate protection from ultraviolet light.

Exposure Times

Follow the guidelines for skin type and exposure times as shown in the table below. Untanned persons should not tan on consecutive days during their first week of tanning. Never tan more than once a day. Tanning normally appears after the first few sessions and maximizes during their first week of tanning. Never tan more than once a day.

Skin Type:
- I Sensitive Skin (Burns easily and severely and does not tan.)
- II Light Skin (Burns easily and severely and tans minimally.)
- III Normal Skin (Burns moderately and tans average.)
- IV Dark Skin (Burns minimally, tans easily and above average.)

</tbody>
</table>

MAXIMUM EXPOSURE TIME IS 20 MINUTES

(When connected to the T-Max® Manager or T-Max® 1A or 3A.)

1. If the remote system has been set to allow a pre-tanning delay time, the timer display (A) will repeatedly flash the delay symbol “dL” and then the remaining delay time. Press the stop button (B) or wait until the delay time has expired to begin the tanning session. The lamps will turn on and the timer will begin to count down from the maximum tanning session time. If a tanning time less than the displayed time is desired, repeat the timer button (B) to decrease the remaining time.
2. Lift the canopy, lie down on the bench (face up), lower the canopy as close to your body as possible, without less than 2” between the canopy acrylic and your body.
3. When the timer reaches “0” the lamps turn off. If you want to stop your session before time expires, press the stop button (C).
4. Raise the canopy by using the outer edge of the canopy, do not push up on the acrylic shield as it may crack. The cooling fans run for three minutes after the lamps shut off to aid in cooling the sunbed.

(When used without remote or when connected to a remote system using a control relay)

1. Press the timer button (B) to begin the tanning session. The timer display (A) displays the remaining time. The lamps will turn on and the timer will begin to count down from the maximum tanning session time. If a tanning time less than the displayed time is desired, repeatedly press the timer button (B) to decrease the remaining time.
2. Lift the canopy, lie down on the bench (face up), lower the canopy as close to your body as possible, without less than 2” between the canopy acrylic and your body.
3. When the timer reaches “0” the lamps turn off. If you want to stop your session before time expires, press the stop button (C).
4. Raise the canopy by using the outer edge of the canopy, do not push up on the acrylic shield as it may crack. The cooling fans run for three minutes after the lamps shut off to aid in cooling the sunbed. The timer will indicate “...” as a reminder to clean the sunbed. After the sunbed is cleaned press the timer button and the display will return to “0”.

Operation

A Timer display - Displays remaining time.
B Timer button - Turns bed on. Timer display shows remaining time. If a lesser time is desired, press timer button until desired time is displayed.
C Stop button - Interrupts tanning session.
D Face tanner button - (Units equipped with facial units only.) Turns face tanner on and off.
Removing/Replacing Lamps

To be assured of maximum tanning effectiveness, change lamps after approximately 800-1000 hours of use. Tanning will continue after this time but at a slower rate. To ensure trouble-free operation of your sunbed, replace the lamp starters whenever the lamps are replaced. We recommend using the lamps specified below. Use of uncertified lamps is a violation of Federal regulations and will void your warranty.

1. Grasp a lamp at one end and at the middle, then turn the lamp a quarter turn. The lamp may then be gently removed from its holder.

2. To reinstall lamp, insert pins on the ends of the lamp into the slots on top of the lamp holder and turn the lamp a quarter turn.

The following lamps have been certified for use in the 28LE series:
Velocity® Wolff® Model VEL 71-T12-100W
Heraeus E400 HPT, Philips Model HPA 400/30s or CosmoTech Model 23045 (Facial Unit Lamps in 28LE2F)

Removing/Replacing Face Tanner Lamps

After removing the canopy acrylic shield, replace the face tanner lamp as follows:

Step 1 Support the face tanner assembly with your hand while unscrewing the two retaining screws. The face tanner glass casing will swing downward.

Step 2 The lamp can now be exchanged. The lamp holders are equipped with spring contacts which enable the lamp to be removed easily. Remove the old lamp and discard. Install the new lamp, using a clean cloth or paper towel. Ensure that the lamp is firmly seated in the lamp holders.

Note! Never take hold of the lamp such that your fingers are in contact with the lamp glass. Finger oils will greatly reduce the lamp's operational life.

Step 3 Gently close the face tanner glass casing and lock it closed with the screws. Ensure that the screws firmly secure the glass casing.

Unfiltered light from face tanner can cause severe burns. Never turn sunbed on while face tanner is disassembled or when glass filters are removed. Immediately discontinue use of this equipment if face tanner glass is broken or any unfiltered light can be seen escaping face tanner assembly.

DANGER
Hour Counter

This sunbed incorporates an ingenious hour counter function into the timing circuitry. It allows the operator of the unit to monitor the hours of use of the lamps, making it easy to determine when to change them. You may also decide to use this function to monitor other time based maintenance tasks.

To determine how many hours the unit has been in service (since the last reset of the hour counter memory), first make sure the timer display shows “0”. Then simply hold the stop button for three seconds. The display will show two pairs of numbers which indicate the number of hours of service, then return to “0”. (example: Display shows 08 then 54. This equals 854 hours.) NOTE: If the unit is connected to a T-Max® remote device, it may briefly lose communication with the remote. This is normal.

To erase the indicated hours, disconnect power from the sunbed. Press and hold the green timer button as you reconnect power. Release the button after a few seconds.

<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
</table>
| Sunbed not tanning | 1. Clean sunbed, see Thorough Periodic Cleaning.  
2. Ensure supply voltage is between 208 and 230V AC.  
3. Replace lamps if lamp hours are greater than 800hrs.  
4. Replace acrylic. |
| Lamps fail to light and timer display is blank | 1. Make sure the unit is connected to a power source.  
2. Check source of AC power. Reset circuit breaker or replace fuse. |
| Timer display changes to indicate a tanning time after the timer button is pressed but lamps do not come on | 1. Bypass plug is not installed, see Electrical Connections.  
2. A bypass plug other than the one sent with your tanning bed has been used.  
3. If remote is being used, other than T-Max® Manager, the external timer may not be activated.  
4. Remote wiring is incorrect, see the instructions provided with the remote interface kit. |
| Timer display continues to show a 0 after the timer button is pressed | 1. T-Max® Manager remote system has not yet been set.  
2. Sunbed address is not set correctly, see Remote Connections. |
| One or more lamps fail to light | 1. Check that lamp is installed correctly.  
2. Switch unlit lamp with a lamp that lights, if new lamp lights and old lamp still does not, replace old lamp. |
| The canopy will not stay up | **NOTE:** Gas springs are manufactured to hold the canopy in its fully open position as well as allow it to rest fully closed. If left open for an extended period of time some creep down may occur. This is considered normal. Keep the unit closed when not in use. If the canopy will not stay fully open when raised...  
1. Raise and lower the canopy a few times to lubricate gas spring internal seals.  
2. Replace gas springs. |

| My bed won’t work with the T-Max® Manager remote system | 1. The sunbed must first be set to a unique address, see Remote Connections.  
2. The bypass plug may be installed in the series in an inappropriate location. Remove bypass plugs when using T-Max® products. |
| When auto-addressing the first bed does not register an address | When using the auto address feature of the T-Max® Manager you must wait 10 seconds from the time you start the auto address function before addressing the first bed. |
| I forgot what address I set my sunbed to | By pressing the stop button and then the timer button, and holding both for 3 seconds, the timer display will show the sunbed’s address number. Press the stop button to exit address mode. |
| My bed, connected to a T-Max® Manager, did not display “dl” but a tanning time and the lamps have come on | 1. Remote device has not been set.  
2. The sunbed has not been connected to the remote system, see Remote Connections.  
3. Delay time of T-Max® Manager has not been set.  
4. Delay time has expired and session has begun.  
5. Auto start function of T-Max® Manager has been turned off.  
Press the timer button to turn on lamps. |

If you did not find the solution to your problem, contact your place of purchase for additional assistance.
24 MONTH “SILVER MEDAL” WARRANTY

Your ETS Distributor (including ETS, LLC if purchased directly), through a manufacturer’s warranty, warrants your tanning unit to be free of structural defects in material and workmanship, under normal use, for its lifetime. Your ETS Distributor will, at its discretion, repair any structural defect which materially affects the performance of the tanning unit, or replace the tanning unit.

For twenty-four (24) months following the purchase date of your tanning unit, your ETS Distributor will provide replacements for parts that prove to be defective in material or workmanship, with the following exceptions: gas springs and ballasts are warranted against manufacturer’s defects for a period of one (1) year; lamp starters and cracked or broken endcaps are warranted against manufacturer’s defects for a period of ninety (90) days; fluorescent lamps are warranted against manufacturer’s defects for a period of thirty (30) days; acrylics are warranted against manufacturer’s defects for a period of six (6) months (prorated) following the purchase date of your tanning unit. Shipping charges will be covered during the first sixty (60) days following the purchase date.

Your ETS Distributor (including ETS, LLC if purchased directly), also extends to you a two (2) year parts warranty on all T-Max® remote system components. External voltage transformers (buck-boosters) are covered by a one (1) year parts and labor warranty, provided you send back the defective transformer.

Labor costs associated with repair or replacement work covered by this warranty will be reimbursed for repair or replacement work required to be performed for a period of sixty (60) days following the purchase date of your tanning unit. Normal wear and tear, damage from misuse or abuse, damage incurred in transit or damages resulting from unauthorized repairs or modifications are not covered by this warranty. Warranty coverage does not include cosmetic abnormalities such as scratches, nicks, dents, or other cosmetic changes that do not materially interfere with the function of the tanning unit.

THIS 24 MONTH “SILVER MEDAL” WARRANTY IS EXPRESSLY MADE IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WHICH ARE HEREBY DISCLAIMED. No one has the authority to change or modify this 24 Month “Silver Medal” Warranty in any respect. To obtain service under this 24 Month “Silver Medal” Warranty, contact your authorized ETS Distributor (or ETS, LLC if purchased directly). Proof of purchase, including serial number, is required.

IN NO EVENT SHALL YOUR DISTRIBUTOR OR THE MANUFACTURER BE LIABLE AT LAW OR IN EQUITY FOR ANY LOSS, LIABILITY, DAMAGE OR EXPENSE IN AN AMOUNT IN EXCESS OF THE PURCHASE PRICE RECEIVED, OR FOR LOSS OF USE OR PROFITS, LOSS OF TIME, INCONVENIENCE, RENTAL OR SUBSTITUTE PRODUCTS, LOSS OF BUSINESS, LOSS OF INCOME, OR ANY OTHER INCIDENTAL, INDIRECT, SPECIAL OR CONSEQUENTIAL DAMAGES. Some states do not allow the exclusion or limitation of incidental or consequential damages, and the above limitation or exclusion will not apply to residents of some states. This 24 Month “Silver Medal” Warranty gives you specific, legal rights and you may have other rights which may vary from state to state.

All warranty service must be performed by an authorized service person using only ETS authorized replacement parts. Use of non-authorized parts may void your warranty. All labor charges must be authorized by your ETS Distributor prior to the start of repairs and must not exceed the established rates and time allotment policies established by your ETS Distributor. If your tanning unit must be returned for service within thirty (30) days from the purchase date, freight charges will be paid for by your ETS Distributor, after which all freight charges shall be at your expense. Contact your ETS Distributor for the authorized Service Center nearest you. This warranty is serial number specific and only applies to tanning units purchased through an authorized ETS Distributor. This warranty is extended to the individual or legal entity whose name appears on the original sales document and may not be transferred to any other individual or legal entity. This warranty is void if the tanning unit is modified in any manner from its original design.

To obtain warranty service contact your place of purchase. Proof of purchase, including serial number, is required for verification. Contact ETS, LLC only if you purchased your equipment directly.

Proudly manufactured in the U.S.A.
